Brief introduction

Hi! I'm a software engineer with a passion for programming

I learned to program when I was 15 in Bac Ninh High School for the Gifted and luckily got certain awards. Since then, I loved programming and wrote my first website when I was 18, this is the website I wrote for my girlfriend. Until now, I am constantly learning new programming languages and technologies by myself.

I love teaching and sharing knowledge, I used to be a teacher at FPT University Scholarship Association, I also taught fundamental programming to a group of students at the University.

My projects

Beckem website

My first website I wrote for my girlfriend

It's like a mini social network for 2 people that helps us save memories. I use what I've learned to continuously update it.

Technologies: Reactjs, Redux, Firebase, Styled-components, Material-UI, Open weather API...
